

2023 Third Quarter

Surveillance Technology Determination Report

Seattle Information Technology

Summary

The Privacy Office received 47 total requests for privacy reviews during Q3 of 2023. 47 technologies and projects were applicable for this report. None of the technologies reviewed during Q3 of 2023 was determined to be surveillance technology.

About This Report

The Seattle City Council passed [SMC 14.18](#) ("Surveillance Ordinance") to provide greater transparency to City Council and the public when the City acquires technology that meets the City's criteria of surveillance. In addition to review and approval requirements for new and existing technologies, the Surveillance Ordinance requires the CTO to submit a quarterly report to Council of all technology acquisitions. This report provides a list of all such technology acquisitions, the process followed, and the determinations for each of the technologies reviewed.

Ordinance Requirement

This document is prepared pursuant to SMC 14.18.020.B.3, which states:

The CTO shall, by no later than 30 days following the last day of each quarter, submit to Council, by filing with the City Clerk and providing an electronic copy to the chair of the committee responsible for technology matters, the co-chairs of the Working Group, the City Auditor, the Inspector General for Public Safety, and the Director of Central Staff, a surveillance technology determination list that includes all technology from that quarter that was reviewed under the process established in subsection 14.18.020.B.1, along with supporting information to explain the justification for the disposition of items on the list. The CTO shall also post the list to the City's website.

How This List Was Compiled

City staff must submit a Privacy and Surveillance Assessment (PSA) before new non-standard technology may be acquired. The assessment is used to determine if a given technology meets the City's definition of "surveillance technology" as defined by the City's Surveillance Policy. City staff were informed of this new process through an all-City email, engagement meetings with critical stakeholders such as IT Client Solutions Directors, financial leadership, and project managers. The report includes technologies and projects reviewed through the PSA process between July 1, 2023 and September 30, 2023. If a technology is discovered to have been acquired outside of this process, the CTO will inform Council. Inapplicable requests for review (for example requests for standard software, redundant requests, consultant contracts, etc.) were removed.

Table of Department Acronyms

The following department acronyms are used in this report and are provided as a reference:

Acronym	Department
CBO	City Budgets Office
CEN	Seattle Center
CSCC	Community Safety and Communications Center
SDOT	Seattle Department of Transportation
HSD	Human Service Department
ITD	Information Technology Department
LEG	Legislative Department
MOS	Mayor's Office
OCR	Office of Civil Rights
OLS	Office of Labor Standards
PKS	Seattle Parks and Recreation
SCL	Seattle City Light
SFD	Seattle Fire Department
SMC	Seattle Municipal Court
SPD	Seattle Police Department
SPU	Seattle Public Utilities

Surveillance Technologies

No technologies reviewed and closed during Q3 2023 were determined to be surveillance technologies.

Non-Surveillance Technologies

Technologies that were reviewed and were not determined to be surveillance technologies have their reviews detailed in the supplemental materials appendix.

Surveillance Technology Criteria Review

7/5/2023

Technology Description

Technology Name	Aveva Reports for Operations 2023 software		
Description	<p>Reports Power Plant Operational Data. VEVA Reports is no-code software with simple drag-and-drop, point-and-click configuration, and integration of real-time sources and manual data to HMI and SCADA, historians, enterprise software and relational databases.</p> <p>This will be used for Reporting on Power Plant operational data.</p>		
Department	SCL	Case No.	4577

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A The technology disparately impacts disadvantaged groups.

N/A There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.

N/A The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

N/A The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

7/5/2023

Technology Description

Technology Name	Hydrocomp Forecast and Analysis Model (HFAM) Software		
Description	<p>HFAM is a continuous simulation modeling software that analyzes current and future reservoir inflows, streamflow, and reservoir elevations.</p> <p>SPU's HFAM model has been developed in conjunction with SPU staff over decades. It has been calibrated especially for the Cedar River and South Fork Tolt watersheds. It is used for water resources planning and management.</p>		
Department	SPU	Case No.	4578

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A The technology disparately impacts disadvantaged groups.

N/A There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.

N/A The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

N/A The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

7/5/2023

Technology Description

Technology Name	Oracle Work and Asset Cloud Service for CITP 683 WAMS Re-Implementation Project		
Description	<p>Oracle Utilities Work and Asset Cloud Service is used to maintain information about assets and various features and functions around managing those assets. The solutions provide a means of recording asset acquisition, maintenance, procurement, installation and removal, and more.</p> <p>Oracle Utilities Work and Asset Cloud Service comprises the following functional areas:</p> <ul style="list-style-type: none"> •Asset Management: functionality to manage the receipt, installation, maintenance, tracking and removal of assets •Management of approval processing •Tracking of purchasing transactions •Tracking of inventory and resources •Tracking of costs, accounting, and financial transactions •Construction Work Management functionality that provides a comprehensive set of processes to facilitate the management of construction work. •Oracle Utilities Cloud Service Foundation: tools used to orchestrate and automate infrastructure related processes and migrate data from legacy applications into the cloud service. •Oracle Utilities Analytics 		
Department	SCL	Case No.	4370

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

7/11/2023

Technology Description

Technology Name	Mobile App: FirstNet - Rapid Response		
Description	<p>CSCC is on track to implement a new first-responder component within the City of Seattle - Alternative Response. This team will respond to lower acuity, non-threatening calls for service for community members in crisis. This team requires integrated radio access in a cost-effective means, to utilize push-to-talk (PTT) communications solution for public safety, all while being transparent and low profile.</p> <p>FirstNet Rapid Response, a mission-critical PTT app-based solution, offers FirstNet customers a 3GPP-based solution with rich set of features, mission-critical performance, and connection to 911 radio dispatch consoles for safety and interoperability. Public safety radio features embedded in a PTT cell phone app.</p> <p>This PTT service will allow CSCC to substantially minimize budget constraints</p>		
Department	CSCC, ITD, SFD, SPD	Case No.	4584

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

8/2/2023

Technology Description

Technology Name	Chat.D-ID AI software		
Description	<p>Canva will allow a module designer to integrate the D-ID App to an existing Canva presentation that will ultimately be downloaded into an MP4 or a PowerPoint (PPT).</p> <p>The D-ID app may allow us to record staff voices to build out a presentation. Recording our voice would be similar to pressing record on a PPT recording and uploading the original recorded content to a SharePoint site/Youtube.</p> <p>Process: A staff person will write an original scenario that does not include any real situations, then upload the text to the D-ID app within Canva. Then, the staff person will select face and voice. Then, the D-ID App will generate an animated Avatar that integrates into a Power Point presentation's original content. Once all recorded files are created, along with our recorded presentation, a staff person will download an MP4 of the full presentation. Then, we will use the recorded content to upload into SharePoint/Youtube. This upload will allow us share out the required modules for our target audience.</p>		
Department	OLS	Case No.	4476

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.

N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.
N/A	Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A	The technology disparately impacts disadvantaged groups.
N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

8/2/2023

Technology Description

Technology Name	Google Cloud Identity Directory Service		
Description	<p>Past, present and future use of the Google Cloud Identity Directory Service. This is the Directory Service that provides for access to Google Cloud Platform Services via Azure.</p> <p>The Google Cloud Identity directory service will not store a large number of users as use is limited to folks that are actively involved with the management of Google Cloud Platform services.</p>		
Department	ITD	Case No.	4615

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A The technology disparately impacts disadvantaged groups.

N/A There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.

N/A The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

N/A The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

8/3/2023

Technology Description

Technology Name	Tremendous gift card software		
Description	<p>Standardized and trusted platform for the purchase of gift cards for research participants.</p> <p>The Tremendous platform allows organizations to pay people around the world. One core element of our platform is choice. People have different preferences for how they prefer to be paid. Organizations use Tremendous to give their recipients a choice of money, prepaid cards, gift cards and charity donations.</p>		
Department	CBO	Case No.	4599

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.
N/A	Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A The technology disparately impacts disadvantaged groups.

N/A There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.

N/A The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

N/A The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

8/22/2023

Technology Description

Technology Name	PPM Accelerator for Project		
Description	This is a lightweight plugin for Office365 to help manage a portfolio of projects.		
Department	SCL	Case No.	4636

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A Technology that is used to collect data where an individual knowingly and voluntarily provides the data.

N/A Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.

N/A Technologies used for everyday office use.

N/A Body-worn cameras.

N/A Cameras installed in or on a police vehicle.

N/A Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.

N/A Cameras installed on City property solely for security purposes.

N/A Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A The technology disparately impacts disadvantaged groups.

N/A	There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.
N/A	The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.
N/A	The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

8/22/2023

Technology Description

Technology Name	ActiveG Nash Workflows		
Description	ActiveG NASH Workflow description: Two way synchronization of Maximo and GIS content to facilitate collection of infrastructure inspection observations by SPU front line operations staff via Field Maps applications and provision of this information back to MAXIMO, SPUs enterprise asset management system		
Department	SPU	Case No.	4646

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

9/28/2023

Technology Description

Technology Name	Starling Connect SaaS Connector		
Description	<p>The City WEvolve project is replacing EV5 with Workday HR (SaaS) which will be the new source of authority for employees.</p> <p>New method of automating updates to the One Identity system with HR-related data.</p> <p>The Starling Workday HR connector is a SCIM from One Identity designed specifically for Workday for this purpose and has been approved by the WEvolve project for outbound integration with Workday.</p>		
Department	ITD	Case No.	4605

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Do any of the following exclusion criteria apply?

N/A	Technology that is used to collect data where an individual knowingly and voluntarily provides the data.
N/A	Technology that is used to collect data where individuals were presented with a clear and conspicuous opt-out notice.
N/A	Technologies used for everyday office use.
N/A	Body-worn cameras.
N/A	Cameras installed in or on a police vehicle.
N/A	Cameras installed pursuant to state law authorization in or on any vehicle or along a public right-of-way solely to record traffic violations.
N/A	Cameras installed on City property solely for security purposes.

N/A Cameras installed solely to protect the physical integrity of City infrastructure, such as Seattle Public Utilities reservoirs.

N/A Technology that monitors only City employees in the performance of their City functions

Do any of the following inclusion criteria apply?

N/A The technology disparately impacts disadvantaged groups.

N/A There is a high likelihood that personally identifiable information will be shared with non-City entities that will use the data for a purpose other than providing the City with a contractually agreed-upon service.

N/A The technology collects data that is personally identifiable even if obscured, de-identified, or anonymized after collection.

N/A The technology raises reasonable concerns about impacts to civil liberty, freedom of speech or association, racial equity, or social justice.

Result

Does the technology meet the criteria for surveillance technology and require a review?

This project/technology does not meet the definition of surveillance technology. This is based on the current information available. The determination is subject to change based on new information or City Council action.

Surveillance Technology Criteria Review

9/28/2023

Technology Description

Technology Name	Win-Situ 5 Software		
Description	PC/laptop software to use with In-Situ equipment (Rugged Reader data logger, and level troll transducers) and other software (Baro Merge).		
Department	SPU	Case No.	4618

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Identifiable individuals also include individuals whose identity can be revealed by license plate data when combined with any other record.

Surveillance Technology Criteria Review

9/28/2023

Technology Description

Technology Name	Integrating Asana with Outlook		
Description	<p>Asana for Outlook keeps the email conversations actionable.</p> <p>Workflow: With the Asana for Outlook integration, turn emails into tasks so they're trackable and actionable. Add an email to an existing task as a comment to keep the context connected to the work. Comment on tasks from Outlook so teammates have the information they need to do their work.</p> <p>https://security.asana.com/</p>		
Department	SCL	Case No.	4633

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice. Surveillance Technology Criteria Review

9/28/2023

Technology Description

Technology Name	ARCOS Mobile QA RN		
Description	<p>SaaS vendor that reduces the crew callout time by ~90% for their average customer.</p> <p>Our complex union rules will be entered into the software to assure the right people are called to respond to an outage event in the right order, reducing the potential for grievances. Employee names, job classifications, supervisor structure, location and contact information will be extracted from PeopleSoft (frequency TBD) and a transfer and load process will be created to load it into ARCOS for dispatchers and supervisors to use to call crew members out to work outage events.</p>		
Department	SCL	Case No.	4666

Criteria

Does the technology meet the definition a Surveillance Technology?

No Technology whose primary purpose is to observe or analyze the movements, behavior, or actions of identifiable individuals in a manner that is reasonably likely to raise concerns about civil liberties, freedom of speech or association, racial equity or social justice.
