Seattle City Hall
600 4th Ave
Seattle, WA 98124

RE: Welcome and UFC introduction

Dear Mayor Harrell,

Duwamish Lands (Seattle, WA) – Congratulations on your successful election campaign! Seattle’s Urban Forestry Commission (UFC) welcomes you as Mayor and wishes you luck as you begin to implement your vision for the city.

The UFC was established in 2009 by [Ordinance 123052](#) to advise the Mayor and City Council concerning the establishment of policy and regulations governing the protection, management, and conservation of trees and vegetation in the City of Seattle.

Seattle’s urban forest provides immense benefits to the city, generating economic value estimated at \$15 million or more annually.¹ Some of the critical services provided by urban forests include reducing the impacts of climate change, promoting community resilience and public health, contributing to Seattle’s culture and sense of place, and managing storm water flows. These urban forest services positively align with your campaign’s stated goals around the climate crisis, health care, arts & culture, and infrastructure. **Investment in the protection and enhancement of the urban forest will help your administration advance multiple goals at once for the benefit of both current and future generations of Seattleites.**

¹ Ciecko, L., K. Tenneson, J. Dilley & K. Wolf. *Seattle’s Forest Ecosystem Values: Analysis of the Structure, Function, and Economic Benefits*. August 2012.
https://www.seattle.gov/documents/Departments/Trees/Mangement/EcoSystem/Seattles_Forest_Ecosystem_Values_Report.pdf. Accessed 3 January 2022. [Note: Value of annual urban forest ecosystem services converted from 2012 dollars to 2021 dollars]

Such investment is urgently needed. The urban forest is threatened on several fronts and losses of mature trees take decades to replace. The best available data suggests canopy cover was trending downward in Seattle from 2007-2015.² Furthermore, the distribution of forest cover throughout the city is highly inequitable. This is concerning because our urban forest will play a significant role in how Seattle mitigates and adapts to climate change, especially extreme heat and rain events. Lack of forest cover correlates strongly with extreme heat in the city, placing many communities at greater risk to these impacts.

That is one reason why preserving tree cover has been a priority for the UFC since its establishment. **The Commission was pleased to see and agrees with the statement on [your campaign website](#) that “[one] key to reducing the impacts of both heat waves and urban flooding is to preserve open space and tree cover.”**

Tree protection ordinances can be good tools for tree preservation. As you know from your service on City Council, the most recent update to Seattle’s tree protection code was adopted as an “interim” policy in 2009 with the intention that it would be updated shortly thereafter following the completion of a tree canopy cover analysis. Now, *well over a decade and [five urban forest studies later](#)*, the interim code still stands. This despite the [City’s own findings](#) that **the current code is not supporting tree protection.**

To better protect trees in Seattle, we need strong Executive support. The UFC strongly urges your administration to allocate the staff time and resources needed to finally complete the task of updating the tree protection code, an effort now in its 13th year.

The [UFC’s members](#) have decades of combined experience in tree care, environmental justice, urban planning, development, architecture, ecology, conservation, public health, and more. The UFC is pleased to serve as a resource to and share its expertise with your office.

You are invited and welcome to join any of the UFC’s regular meetings or to request informational or deliberative sessions at times that are convenient for you. Alternatively, or in addition, please advise whether there are staff members we should reach out to for engagement on urban forest policy.

In 2022, the UFC will continue serving the City and its urban forest by:

1. supporting stronger tree and urban forest protection policies;
2. advocating for appropriate funding to implement urban forestry policies and programs;
3. improving outreach and engagement with City leaders and community members; and
4. participating in the City’s Comprehensive Plan update process.

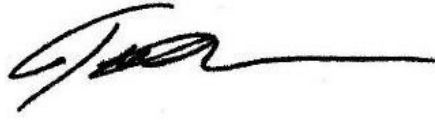

Again, the UFC extends its congratulations to you and your team and wishes you the best as Seattle’s new mayor.
